JOURNAL OF MOLECULAR LIQUIDS

Contents of Volume 54

Kinetic isotope effect in hydrogen isotope exchange between diphenylphosphine and hexylamine in aprotic solvents
A. Wawer and I. Wawer (Pasteura, Poland) 1
Ultrasonic and thermodynamic investigations of weakly interacting systems
R.K. Dutta and S.N. Bhat (Shillong, India) 9
The study of Raman spectra of chloroform C–H vibrations in liquids
F.H. Tukhvatullin, A.K. Atakhodjaev, A. Djumabaev, U.N. Tashkenbaev, I.P. Kleiner and S.A. Osmanov (Samarkand, Uzbekistan) 19
Ultrasonic studies on Na_2SO_4 in dioxane–water mixtures at different temperatures
An. Kannappan and V. Rajendran (Annamalai Nagar, India) 27
Anisotropy of molecular reorientation in liquid methylene chloride
A. Hacura (Katowice, Poland) 33
Higher-order cumulants in the study of reorientational molecular motions
K. Pasterny (Katowice, Poland) 39
Convolution of molecular velocities and its use in vibrational relaxation probabilities calculations
S.S. Miljanić and D.D. Golobočanin (Belgrade, Yugoslavia) 45
Nematic-smectic A tricritical phase transition in binary mixture of liquid crystals
H. Yurtseven (Istanbul, Turkey) 51
Quantum time correlation functions for solute–solvent intermolecular potentials: influence on the far-infrared spectrum
J.M.M. Roco, J.A. White, S. Velasco and A.C. Hernández (Salamanca, Spain) 57
Depolarized light scattering from monoatomic fluids – test of the diffusional model by means of molecular dynamics simulations
Z. Gburski, M. Gruska (Katowice, Poland) and Th. Dorfmüller (Bielefeld, Germany) 63
Analysis of memory and nonadditivity effects on the far infrared spectra of HCl in rare gas liquids
A. Medina, A. Calvo Hernández and S. Velasco (Salamanca, Spain) 67
Rayleigh light scattering spectra in critical mixtures
L.M. Kashaeva, V. Yu. Lerman, L.M. Sabirov, T.M. Utarova and Ya. Turakulov (Uzbekistan, USSR) 73
Analytical model for kinetics of emission spectra and anisotropy of inhomogeneous ensemble of dipole molecules
V.I. Tomin and V.I. Shneerson (Minsk, USSR) 77
NMR and Raman spectroscopic study of $CDCl_3$ in cyclohexane solutions in the presence of pyridine, quinuclidine or triethylamine
S. Bagley, J. Kowalewski and M. Sandström (Stockholm, Sweden) 89
High dielectric constant supercooled liquids, tools in energetic problems
G. Berchiesi, F. Farhat, M. de Angelis (Camerino, Italy) and S. Barocci (The Hague, The Netherlands) 103
On the pseudo-Grüneisen parameters of molecular liquids
J.N.C. Lopes, L.P.N. Rebelo and G. Jancsó (Lisbon, Portugal) 115
Montecarlo calculation of the structure of liquid acetonitrile
G. La Manna (Palermo, Italy) and C.E. Notaro (Rome, Italy) 125
An ultrasonic preliminary study of the equilibria involved in solutions of bipyridil
F. Farhat and G. Berchiesi (Camerino, Italy) 131
Temperature dependence of reorientational diffusion in hexafluorobenzene
P. Yuan and M. Schwartz (Denton, TX, USA) 137

A solution-state dipole moment and microwave dielectric loss study of Ti, Zr, Hf and Sn cyclopentadienyl compounds
G.W. Allen, M.J. Aroney, S.W. Filipczuk and L. Phillips (Sydney, NSW, Australia) 147
Mean field theory of the nematic-smectic A phase transition in a mixture of liquid crystals
H. Yurtseven and S. Salihoglu (Istanbul, Turkey) 155
Quasi-chemical theory of solvation of excess electrons in polar liquids
S. Petrucci (Farmingdale, NY, USA) 173

Special Issue: Molecular Motion and Structure in Disordered Condensed Matter — A Collection of Papers Marking the Retirement of Professor Jack Powles

Publisher's Note i

Preface vii

NMR Relaxation in binary aqueous mixtures of acetone and tetrahydrofuran
L. Ludwig and M.D. Zeidler (Aachen, Germany) 181
Temperature and pressure dependence of self diffusion in non-associating liquids
F. Bachl, T. Vardag, S. Wappmann and H.-D. Lüdemann (Regensburg, Germany) 193
Variable temperature, frequency and high-pressure carbon-13 NMR relaxation studies of a traction fluid and some of its analogues
D.G. Gillies, Guildford, UK), S.J. Matthews (London, UK) and L.H. Sutcliffe (Guildford, UK) 205
Experimental techniques for studying order on different length scales for micellar liquid crystals
N. Boden (Leeds, UK) 215
Anyons and coherent methyl rotation spectroscopy
S. Clough (Nottingham, UK) 229
Diffusion of fluids in porous solids probed by pulsed field gradient spin echo NMR
P.T. Callaghan, A. Coy (Palmerston North, New Zealand), D. MacGowan and K.J. Packer (Sunbury-on-Thames, UK) 239
Studies of molecular diffusion in porous crystals (zeolites)
H. Pfeifer and J. Kärger (Leipzig, Germany) 253
A Monte Carlo study of methane adsorption in aluminophosphates and porous carbons
R.F. Cracknell and K.E. Gubbins (Ithaca, NY, USA) 261
NMR studies of the diffusion of cyclohexane in porous silica
A. Mitzithras, F.M. Coveney and J.H. Strange (Canterbury, UK) 273
The new U.S. National High Magnetic Field Laboratory
E.R. Andrew (Gainesville, FL, USA) 283
Intermittency and cooperativity of the atomic dynamics in a micropore
J.G. Powles (Canterbury, UK), A. Dornford-Smith (London, UK) W.A.B. Evans (Canterbury, UK) and M. Pagoda (Cracow, Poland) 289
Orientational correlations in molecular fluids: a diffraction perspective
J.C. Dore (Canterbury, UK) 297
The direct correlation function for a fluid of hard molecules
G. Rickayzen (Canterbury, UK) 311
MEMD "q-Kick Response" method for the evaluation of the dynamic structure factor
W.A.B. Evans and C.J. Ojeda (Canterbury, UK) 321

Contents of Volume 54 333
